## BREAKING HEADLINE NEWS

WHILE YOU WERE SNOOZIN'

**Warren Buffet Bounces**

The man who made Las Vegas synonymous with over eating, innovator of salad bars, founder of Sizzler and Soup Plantation:

Announces plans to bow out for good. Citing the economic impact of uncertainty caused by the orangest serial rapist that ever walked all over all life on earth.

### Toxic Ass Gas

A new study by researchers at UCLA reveals that sniffing the farts of others initiates cognitive decline in mice. So far they have found no way to reverse the effects and believe the same phenomenon affects humans.

### Another Actor Announces Bid to Replace the soon to be termed out Governor of the Sunshine State

The only Film to feature two American Governors is "Predator". Come 2026 that may change. Among several actors to run for office comes an announcement by William Fortnite

# Getting To Know Thyself

- The brain is designed, by millennia of evolutionary adaptations, to keep us alive
- The truth is not always conducive to survival
- The brain is constantly storing and calculating info the conscious mind has not the power to be aware of
- Decisions are made by the brain beneath the level of consciousness before we become aware of them.
- We are not technically responsible for our actions.
- Who we are is a product of our environment and our physiology guided and molded by reinforcement, reward and punishment
- Absence of accountability diminishes the mind's compliance with societal pressures and impositions
- The brain, and along with it the body, synthesizes happiness when it can't be obtained authentically
- The body and mind change to prefer that which we have to that which we are unable to obtain in order to maintain stability.
- People commonly presume we'd be happier if we got what we want, instead of changing to appreciate what we have but the evidence opposes this intuition.

## Urgent Update

Feb 1st 2025

Leaked Documents Reveal Zuckerberg's Sinister Plan - Affiliates cut ties and denounce the demented CEO

A shocking revelation has rocked the tech world as leaked documents suggest Mark Zuckerberg's true intentions for his vast social media empire. Sources close to the matter have revealed that Zuckerberg plans to exploit his platforms to facilitate the exploitation of vulnerable children, generating profits to fund a clandestine neurotechnology project.

Code-named "Erebus," the project allegedly aims to develop advanced brain-computer interfaces (BCIs) that could potentially control human minds. Insiders claim that Zuckerberg believes this technology will secure his legacy as the most influential person in human history.

The leaked documents implicate several high-ranking Facebook executives and suggest that the company has been secretly collecting and analyzing user data to identify vulnerable populations, including children.

As the news spreads, lawmakers and child protection advocates are calling for immediate action. "This is a stark reminder of the dangers of unchecked power and greed," said Senator Maria Rodriguez. "We must hold Zuckerberg and Facebook accountable for their actions."

Zuckerberg's representatives have denied the allegations, calling them "baseless conspiracy theories." However, the leaked documents and whistleblower testimony paint a damning picture.

The world watches with bated breath as this story unfolds, demanding answers and justice for those who may have been harmed.

### Historic Shift in Global Perception Humanity Awakens to Scientific Truths

In an unprecedented moment of collective awakening, people around the world are coming to terms with the overwhelming evidence supporting the existence of dinosaurs and the heliocentric model of our universe.

This newfound understanding has sparked a reevaluation of traditional belief systems, including Abrahamic religions. Many are acknowledging the inherent contradictions between scientific facts and religious dogma.

The realization has also led to a reckoning with the darker aspects of religious institutions. Experts estimate that over 100 million children have been victims of sexual abuse within churches over the past millennium.

Furthermore, the world is confronting the complicity of religious leaders in some of humanity's darkest moments. The Holocaust, which resulted in the systematic murder of six million Jews and millions of others deemed undesirable, is a stark reminder of the devastating consequences of silence and inaction.

Historians and scholars are highlighting the role of religious leaders, including Pope Pius XII, in failing to speak out against the atrocities committed during the Holocaust. This silence, born from a complex web of political, ideological, and theological factors, enabled the Nazi regime to carry out its genocidal agenda with relative impunity.

As the world grapples with these revelations, people are seeking answers and accountability. Global conversations are underway, focusing on the importance of scientific literacy, critical thinking, and the protection of human rights.

This seismic shift in collective consciousness promises to reshape the fabric of society, as humanity continues its journey toward a more informed, compassionate, and just world.

# CALIFORNIA ECOSYSTEMS HEAL AS MAGA FOLLOWERS DEPART

## Breaking News

In a shocking turn of events, millions of Californians are rejoicing as the state's habitats and ecosystems begin to heal from years of mistreatment.

The sudden transformation is attributed to the mass exodus of MAGA supporters who followed Elon Musk out of California after he relocated his X and SpaceX headquarters to Texas.

With the departure of the MAGA followers, California is experiencing a rebirth. Wildlife is returning, air and water quality are improving, and the state's iconic landscapes are regaining their former glory.

Your God Created Me and My Minions

Make AMERICA POOP!

WE CAUGHT UP WITH THE BRILLIANT AND INSIGHTFUL LOVE FEELS BEST A FEW WEEKS AGO AND HAVE SHARED OUR CONVERSATION BELOW.

HI LOVE FEELS BEST, SO EXCITED TO HAVE YOU WITH US TODAY AND WE ARE REALLY INTERESTED IN HEARING YOUR THOUGHTS ABOUT HOW FOLKS CAN DEVELOP THEIR EMPATHY? IN OUR EXPERIENCE, MOST FOLKS WANT TO BE EMPATHIC TOWARDS OTHERS, BUT IN A WORLD WHERE WE ARE OFTEN ONLY SURROUNDED BY PEOPLE WHO ARE VERY SIMILAR TO US, IT CAN SOMETIMES BE A CHALLENGE TO DEVELOP EMPATHY FOR OTHERS WHO MIGHT NOT BE AS SIMILAR TO US. ANY THOUGHTS OR ADVICE? I SUPPOSE EMPATHY BEGINS WITH A SIMPLE CHOICE OR REALIZATION.

NUMEROUS EVENTS MAY CAUSE A SUDDEN CHANGE OF HEART OR A REALIZATION, AT ANY AGE. THIS CAN INSPIRE A SUBSEQUENT DECISION TO PLACE IMPORTANCE ON THE WELFARE OF PEOPLE AND OTHER LIFE FORMS.

FEELINGS OF EMPATHY ARE OFTEN ACTIVATED WHEN WE SEE OURSELVES IN OTHERS. RECOGNIZING OUR SIMILARITIES AS WELL AS THE SAMENESS OF OUR STRUGGLES, PAIN AND FEAR FOSTERS CONNECTIONS.

EXPERIENCE ALSO GOES A LONG WAY. THE OLDER WE GET THE MORE MISTAKES WE HAVE MADE SO THE LESS PERFECTION WE EXPECT FROM OTHERS.

THERE ARE MANY WAYS PEOPLE NATURALLY DEVELOP EMPATHY. THERE MAY BE MORE REASONS YOU ARE DISCOURAGED FROM THEM BY FAMILY AND SOCIETY TO ENABLE YOU TO RIDICULE, FIGHT, ISOLATE, SELL, DECEIVE, DISEMPOWER, DETACH, LABEL AND DEHUMANIZE.

SHARED PAIN IS USUALLY A PROFOUND WAY FOR VERY DIFFERENT HUMANS TO CONNECT. IT HAS LONG BEEN UNDERSTOOD THAT A SHARED ENEMY IS THE BEST WAY TO UNITE TWO INDIVIDUALS OR GROUPS THAT DISLIKE EACH OTHER OR HAVE AN ADVERSARIAL RELATIONSHIP.

TO BETTER UNDERSTAND EMPATHY I THINK IT'S HELPFUL TO CONTRAST IT WITH AN IDEA LIKE COMPASSION. EMPATHY IS A PASSIVE, FEELING WORD. COMPASSION IS AN ACTIVE, DOING WORD. THERE IS NO RELIEF WITHIN EMPATHY. YOU SIMPLY FEEL IT AND ONLY WITH TIME AND SPACE WILL THE EMOTION DISSIPATE. WITH COMPASSION YOU CAN ACT TO REDUCE THE DISCOMFORT CAUSED BY SHARED SUFFERING. YOU CAN OFFER A SMILE, A KIND WORD, HELP THEM UP, ETC AND THESE ACTIONS HELP TO DIMINISH THE PAIN YOU BOTH FEEL.

EMPATHY IS PROBABLY IMPOSSIBLE IF WE DO NOT SLOW DOWN, PAY ATTENTION AND ASSIGN VALUE TO OTHERS AND THEIR FEELINGS.

OFTEN SOCIETY PUSHES US TO AVOID EACH OF THESE INSTANCES. OUR HANDHELD COMPUTERS DO NOT USUALLY HELP THE PROPENSITY TO OVERLOOK MANY THINGS. SPENDING TIME IN THE PRESENT MOMENT WITH YOUR FULL ATTENTION IS VITAL TO CONNECTING WITH AND LOVING OTHERS.

THANKS, SO BEFORE WE MOVE ON MAYBE YOU CAN SHARE A BIT MORE ABOUT YOURSELF?

I'VE ALWAYS KINDA BEEN UNUSUAL. AS A BABY I NEVER CRIED. MY MOTHER WAS FORCED TO POTTY TRAIN ME EARLY BECAUSE I REFUSED TO WEAR DIAPERS. EVEN TODAY WEARING CLOTHES FEELS OPPRESSIVE.

STORIES OF MY DISOBEDIENCE AND UNQUENCHABLE CURIOSITY ABOUT THE NATURE OF REALITY BEGIN DURING PRESCHOOL.

THESE WERE NEVER TRAITS ANYONE ENCOURAGED. SUCH QUALITIES, OR DEFECTS AS MOST OF MY TEACHERS VIEWED THEM, JUST SEEMED TO COME NATURALLY TO ME. JUST LIKE BEING INHERENTLY ORGANIZED OR DETAIL ORIENTED WHICH I LATER LEARNED ARE QUALITIES I AM GENETICALLY PREDISPOSED TO. THAT IS JUST A FANCY WAY OF SAYING THAT QUALITIES PASSED DOWN BY ANCESTORS MAKE ME MORE LIKELY TO BE ORGANIZED AND ATTENTIVE TO DETAILS.

I TEND TO PREFER NOT TO CONFINE MYSELF TO PARTICULAR LABELS OR IDEAS. THAT WHICH IS THIS, IS NOT THAT. LABELS TEND TO DEHUMANIZE PEOPLE AND REDUCE THEM TO A SINGLE OR FINITE IDEA WHICH IS NEVER REALISTIC.

I FEEL THAT I'M CONSTANTLY CHANGING, EVOLVING AND GROWING ON A SURFACE LEVEL. AT THE SAME TIME MY FOUNDATION GROWS STRONGER AND HEAVIER AS IT BECOMES FORTIFIED BY NEW DATA.

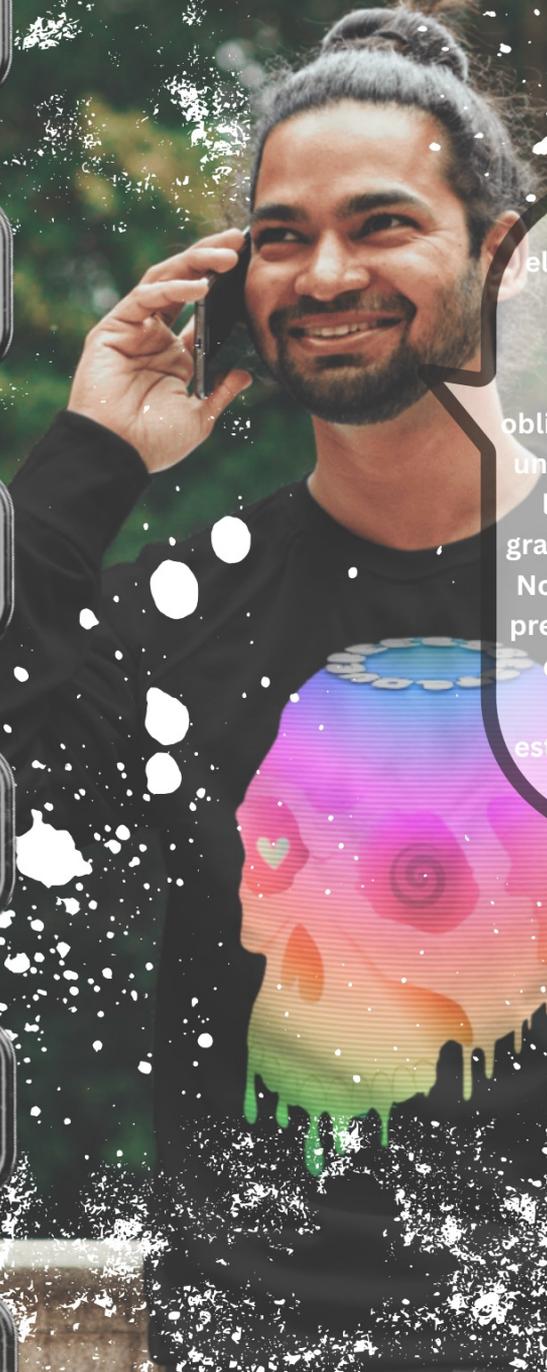

IF YOU HAD TO PICK THREE QUALITIES THAT ARE MOST IMPORTANT TO DEVELOP, WHICH THREE WOULD YOU SAY MATTER MOST?

HONESTY OR AUTHENTICITY BECAUSE THE ONLY WAY TO TRULY KNOW YOURSELF, CONNECT WITH PEOPLE OR LEARN ABOUT THE NATURE OF REALITY IS TO BE YOURSELF AND SAY WHAT YOU FEEL. DECEPTION IS A CHOICE THAT OUGHT TO BE VIGOROUSLY REJECTED. IF LIBERTY IS A JET PLANE, TRUTH IS JET FUEL.

ADAPTATION IS KEY BECAUSE THE ONE THING WE CAN TRULY PREDICT AND COUNT ON IS CHANGE. IF WE DO NOT LEARN BE FLEXIBLE AND BEND IN THE WIND LIKE BAMBOO WE WILL SNAP UNDER THE PRESSURE THAT RIGIDITY INFLECTS.

ATTACHMENT TO THAT WHICH WILL NOT LAST CAUSES MUCH SUFFERING, NEEDLESSLY. I COULD BE SAD THAT THIS GLASS WILL BREAK AND AVOID USING IT OR I CAN APPRECIATE HOW MUCH IT SERVES ME WHILE IT EXISTS AND USE IT AS BEST I CAN AS MUCH AS POSSIBLE. CHERISHING IT AS TIME ELAPSES BECAUSE I KNOW THAT IT WON'T LAST.

I CONSIDER A WELL DEVELOPED INTUITION TO BE MY MOST IMPORTANT QUALITY. THE VAST MAJORITY OF THE BRAIN'S CALCULATIONS OPERATE BELOW THE LEVEL OF CONSCIOUSNESS, BENEATH OUR AWARENESS. WHEN WE LEARN TO FORTIFY, DEVELOP AND TRUST, WHAT SOME MIGHT CALL OUR INNER VOICE, WE TAP INTO AN INTELLIGENCE FAR BEYOND THAT WHICH WE ARE ABLE TO ACCESS AT THE SURFACE LEVEL. CLOUDED BY OUR SELF STORY AND EGO DRIVEN CONCERNS, AMONG OTHER THINGS, THE MIND IS OFTEN PREOCCUPIED AND OVERLOADED WITH DEBRIS. THE FLOW STATE IS EASIEST TO TAP INTO WHEN WE STRENGTHEN THE CONNECTIONS IN OUR BRAIN TOWARD EMPOWERING OUR INTUITIVE ABILITIES.

## Tyrants of the tech industrial complex

*Elon Musk*

Faces criticism for environmental and labor practices. Tesla's relies on resource-intensive mining for materials like lithium and cobalt, raising concerns about ecological damage and unethical labor conditions in supply chains. Overworked employees, unsafe working conditions, and anti-union sentiments at Tesla factories have been reported.

*Jeff Bezos*

Criticized for the company's environmental impact, including its massive carbon footprint and contribution to waste. Additionally, Amazon has been accused of poor labor practices, such as grueling warehouse conditions, low wages, and anti-union efforts, highlighting the human cost of its success.

*Mark Zuckerberg*

Has faced widespread criticism for enabling misinformation, hate speech, and data privacy breaches on his platforms. His company has been accused of exploiting user data and contributing to social polarization, while workplace issues like employee burnout and toxic culture further tarnish his reputation.

*Larry Ellison*

stands accused of anti-competitive practices and costly litigation against competitors. Receives accusations of poor labor practices at Oracle, such as layoffs and lack of employee support. Ellison has close ties to fascist political figures and his resistance to workplace diversity initiatives make him unpopular with diversity advocates

## A Few Notes To Remember

- **Worker Exploitation**: Poor conditions, low wages, and anti-union practices.
- **Environmental Harm**: Resource extraction and pollution damage ecosystems.
- **Habitat Destruction**: Tech expansion displaces wildlife and disrupts habitats.
- **Widening Inequality**: Concentrated wealth deepens global economic divides.
- **Data Exploitation**: Mass collection and misuse of personal data, risking privacy and security for profit.

## The Tech Industrial Complex - a new era of concentrated power and global domination using technologically advanced systems of manipulation.

In a stark warning, experts and critics are sounding the alarm about the grave threats posed by the tech industrial complex to society. At the heart of the issue is the way in which hate and division have become lucrative business models, driving people apart and granting unprecedented power to the new ultra-powerful billionaire class.

"The tech industry's obsession with engagement metrics and advertising revenue has created a toxic online environment," said Dr. Rachel Kim, a leading expert on the social impact of technology. "By prioritizing clicks and shares over factual accuracy and social responsibility, tech platforms have inadvertently fueled the spread of hate speech, misinformation, and conspiracy theories."

This phenomenon has been dubbed "outrage economics" by some critics, who argue that tech companies are profiting from the amplification of divisive and inflammatory content. By creating online echo chambers that reinforce existing biases, tech platforms have enabled the proliferation of hate groups and extremist ideologies.

"The consequences of this are far-reaching and devastating," warned Sarah Taylor, a prominent advocate for online safety and accountability. "By eroding social cohesion and fueling division, tech companies are undermining the very fabric of our democracy. Meanwhile, the billionaire class is reaping the rewards, accumulating unprecedented wealth and power."

As the tech industry continues to consolidate and expand its influence, concerns are growing about the emergence of a new trillionaire class. With their vast resources and networks of influence, these ultra-rich elites are poised to shape the global agenda and dictate the terms of public discourse.

"The rise of the trillionaire class represents a profound threat to democratic values and social justice," said economist and social critic, Dr. Robert McChesney. "By concentrating wealth and power in the hands of a tiny elite, we risk creating a new era of feudalism, where the privileged few dictate the fate of the many."

As the public begins to wake up to the dangers posed by the tech industrial complex, calls are growing for greater accountability, regulation, and transparency. Whether policymakers and regulators will respond with sufficient urgency and force remains to be seen. One thing is certain, however: the future of democracy and social cohesion hangs in the balance.

To fully explore the concept of free will and if humans have it, first we need to understand self, identity and personality. Second we need to understand a little bit about how the brain functions and how the body and outside world might influence it.

Who am I? I am a story which is a combination of physical characteristics, genetic components plus, a series of reinforcements that shaped my behavioral tendencies and patterns, and then some.

I am a product of my environment, the people around me when I was impressionable and malleable coupled with my physiology which can be manipulated and dictated by everything from seasons, to air quality, to how much sleep I have had this day, week, month year and so on. Another factor that ought to be considered are my relationships with, and dependency on, other organisms. From bacteria and fungi to bees and dogs. We are also moody. Our moods and hormones can be influenced by many other stimuli as well. We are not static, unchanging, frozen or stone like beings. What I like today, I may dislike tomorrow and my proclivities may even change within minutes or seconds.

Our brains are capable of computing a billion billion calculations per second. Written numerically that number is 1,000,000,000,000,000,000. A one followed by eighteen zeros, calculations per second. The conscious mind simply does not have the capacity to be aware of all this processing.

Most of how we make decisions goes on "Behind the curtain". We only become aware of the brains decisions, that have been mulled and calculated many times over, after the fact, when they are ready to be applied.

Research suggests that when you pick up an object the brain has decided it long before you consciously become aware of it. It's almost like the brain just tells us a moment before, so we have some idea of why the object is being picked up. I think this can help us to understand intuition, being in the zone or flow. These states of mind occur when there is a strong connection or lack of questioning the calculations that form beneath the level of consciousness and this enables us to have faster reflexes and trust in the lower regions of our intelligence.

So, our personalities are determined by our biology, genetics, hormones and other factors like interactions with other organisms and animals but also, a series of teachings such as negative and positive reinforcements and punishments we experienced especially as kids.

Let's suppose for example at age 5 you tell a joke and everyone laughs and you enjoy their reaction. You'd be more likely to repeat that behavior. And if the next joke you told got another warm reception you'd be even more likely to do it again. Your brain would wire itself to make you more likely to think in a way that is conducive to this behavior. The more we think a certain way the more the brain wires itself to enable us to think that way.

Conversely, if you had told a joke and nobody laughed, instead someone said "That was dumb, you're not funny.", Then you'd be less likely to have joke telling as an attribute of your personality, and eventually, an aspect of your personal identity.

Just because the conscious you doesn't make decisions, as they are decided beneath the level of consciousness, that doesn't eliminate the necessity of accountability. The part of you that does make decisions still responds to consequences and takes potential punishments into account.

Since we did not choose our biology, how we were reinforced or punished, which people and organisms surrounded and shaped us or how fast or slow our minds are, how can it be proposed that we have the will to make decisions?

Perhaps it's not even a valid question, once we have a robust understanding of how humans actually operate. It's not really the correct way to ask if we are responsible for our actions. It's a bit gray. On some levels we are free and on some we are not. Some things that determine who we are and what we do are under our control while most things are not. Maybe it's bit like asking do we have free will over the weather outside? Well we can find shelter, change clothing or change locations so, at times, so in that regard we do but we can't yet actually change the weather itself. As adults we certainly have more power to control our surroundings and the people, places, animals and organisms we associate with but we are still symbiotes that do not have total control.
